SUMMARY

Flutter developer with **3+** years of experience architecting and shipping **4** production apps live on the App Store and Google Play. Currently sole architect for a live gaming and language-learning platform with a rapidly growing five-figure user base, owning system design end-to-end and mentoring a junior engineer. Specialized in modular architecture, complex UI engineering (SVG rendering, gamified UX), payment integration, and disciplined CI/CD release ownership (Codemagic, Shorebird OTA).

EXPERIENCE

Darkmatter Game Production

Flutter Developer (Sole Architect)

Nov 2025 – Present

Kathmandu, Nepal

- **Architecture Ownership:** Sole architect and engineer for two live products (gaming and language-learning) — own system design, technical decisions, and implementation end-to-end with zero architectural technical debt.
- **Team Leadership:** Mentor junior developers through code reviews, architecture guidance, and technical onboarding.
- **Nobigo:** Grew and maintain a live learning platform with a rapidly expanding five-figure active-user base; built SVG-based character stroke tracing, gamified learning UX, and a modular content system spanning 5 subject areas (Alphabets, Kanji, Vocabulary, Grammar, Learning Paths).
- **CI/CD & Release Engineering:** Run a disciplined twice-weekly release cadence via Codemagic and Shorebird OTA — feature releases every Thursday, hotfix/bug-fix releases every Monday — eliminating ad-hoc, unpredictable app-store submission cycles.
- **Payments & Performance:** Integrated Fonepay QR subscription billing; run ongoing performance profiling to eliminate frame jank and reduce cold-start latency.

BlackTech

Flutter Developer

Jun 2024 – Aug 2025

Pokhara, Nepal

- **Team Collaboration:** One of 3 engineers on the mobile team; involved in sprint planning, code reviews, and technical design discussions across concurrent production products.
- **RestroX (Lead Developer):** Designed and shipped 10+ modules end-to-end — order management, checkout, dish menus & submenus, inventory control, finance analytics, real-time reporting, and staff operations. Took the product from zero to live on both platforms, now widely used by restaurants across major cities in Nepal and internationally.
- **Simple Patro (Architect):** Delivered a Nepali calendar platform with Bikram Sambat conversion, festival data, Rashifal, and full localization for Nepali users.
- **Engineering Standards:** Introduced Clean Architecture and SOLID principles; built reusable component libraries and a code-review process later adopted team-wide.

Websoft Technology Nepal

Flutter Developer

Oct 2023 – Apr 2024

Pokhara, Nepal

- Built and shipped Flutter client apps for event management and organizational platforms; integrated RESTful APIs and real-time data sync.

Pine Software

Flutter Developer

Feb 2023 – Oct 2023

Pokhara, Nepal

- Contributed to healthcare and government Flutter applications; implemented authentication flows, local storage, and responsive cross-device UI.

LIVE PRODUCTS & PROJECTS

Tech stack and links for products referenced above — see EXPERIENCE for role and impact details.

Nobigo — Multilingual Learning Platform | Darkmatter Game Production | [Google Play](#) [App Store](#)

- **Stack:** Flutter, Firebase (Auth, Firestore, FCM), Hive, custom SVG rendering engine, Fonepay QR billing. Offline-first, built for multi-language expansion.

RestroX — Restaurant Management System | BlackTech | [Google Play](#) [App Store](#)

- **Stack:** Flutter, BLoC, REST APIs, real-time reporting layer. 10+ modules covering the full restaurant operations workflow.

Simple Patro — Nepali Calendar | BlackTech | [Google Play](#) [App Store](#)

- **Stack:** Flutter, Provider, SQFlite. Bikram Sambat date-conversion engine with full Nepali localization.

Goreto — Trek Booking & Navigation | Freelance / Contract | [Google Play](#) [App Store](#)

- **Stack:** Flutter, Maps & geospatial navigation, offline caching. Trek booking, accommodation, and equipment marketplace built for low-connectivity environments.

EDUCATION

Prithvi Narayan Campus

Bachelor of Science in Computer Science and Information Technology (BSc CSIT)

2021 – 2025
Pokhara, Nepal

SKILLS

Core : Flutter, Dart, Clean Architecture, MVVM, SOLID, BLoC, Provider

DevOps & Release : Codemagic, Shorebird (OTA), GitHub Actions

Backend & Data : REST APIs, GraphQL, Firebase (Auth, Firestore, FCM), Hive, SQFlite, Drift

Platform : Fonepay QR & Subscription Billing, BLE Integration, Maps & Navigation, SVG Rendering, Platform Channels, Real-Time Sync

Other Languages : Kotlin, Swift, Java, JavaScript, SQL
